

Daniel Mihaylov

UX/UI DESIGNER

Portfolio: danielmihaylov.netlify.app

EXPERIENCE

E-Commerce Developer

June / 2026 - current

NUTRIKAL

Building fully custom websites, internal business tools and AI-powered content workflows for food-supplement brands, end to end — from design system through to production frontend.

- Own the visual language across each site — a consistent colour palette, a modular type scale and a reusable component library that keep every template and page coherent;
- Build responsive, high-performance frontends with Vue.js (server-side rendering and reactive client) and TypeScript, consuming REST APIs from a contract-first OpenAPI 3.0 design;
- Designed and built an in-house ERP + CRM web app (Next.js, Supabase / PostgreSQL, Cloudflare Workers) for contract manufacturing — client management, offers, invoicing, inventory and production orders, with role-based access for admin, sales and production teams in English and Bulgarian;
- Built an AI-powered auto blog publisher (Node.js, GitHub Actions) that generates SEO articles and publishes them to Shopify stores through the GraphQL Admin API, with automatic internal linking between products and articles (pgvector);
- Built an in-house content tool featuring a low-code, drag-and-drop editor and a state-machine-driven publishing pipeline, with live-updating data over WebSockets / SSE;
- Create interactive 2D visualizations and state-driven UI with SVG and HTML5 Canvas, refined with motion design and micro-interactions for engagement;
- Prototype in Figma and ship accessible, WCAG 2.1-compliant components within authentication-aware flows (SSO / OAuth, MFA-ready);
- Use AI tools daily across design and development: GPT-6.1 Astral for image generation and low-level code tasks, Claude Code (Fable 5) for high-level complex tasks and polished Markdown documentation, and Gemini AI for copy generation;
- Rapidly prototype demo websites with AI-assisted workflows, adapting layouts to different client niches and turning rough briefs into polished, conversion-oriented landing pages.

Web Designer

June / 2025 - April / 2026

ART CITY STUDIO

Designed web pages focused on clear structure, usability and a memorable experience.

- Designed wireframes, prototypes and high-fidelity mockups in Figma and Sketch, grounded in information architecture, interaction design and usability heuristics;
- Conducted user research and applied UX principles to translate complex concepts into intuitive, accessible interfaces;
- Built and maintained a shared design system and component library, enforcing colour, type and layout consistency;
- Created visual content for websites, online stores, email newsletters and digital campaigns;
- Collaborated closely with developers, the marketing team and the project manager on campaigns and new product lines.

Graphic Designer

Nov / 2022 - Feb / 2023

WILD ART

Graphic design intern designing custom t-shirts and preparing production files across DTG, UV and hot-foil printing, plus laser engraving on wood and metal — hands-on work connecting design to production.

TECH STACK

Design: UX research, information architecture, interaction design, usability heuristics, design systems, prototyping — Figma, Adobe XD, Sketch, Photoshop, Illustrator, InDesign

Frontend: Vue.js (SSR, reactive client), TypeScript / JavaScript, HTML5, CSS3, SVG, HTML5 Canvas

Backend & Data: Next.js, Node.js, Supabase / PostgreSQL, pgvector, Shopify (GraphQL Admin API), GitHub Actions, Cloudflare Workers

Integration: REST / OpenAPI 3.0, real-time UI (WebSockets / SSE), WCAG 2.1 accessibility, auth flows (SSO / OAuth, MFA)

AI Tools: GPT-6.1 Astral (image generation, low-level code tasks), Claude Code / Fable 5 (high-level complex tasks, polished Markdown files), Gemini AI (copy generation), prompt engineering

Workflow & Delivery: AI-assisted website creation, demo site production, rapid prototyping, content automation, component systems, responsive QA, client-ready page assembly

EDUCATION

Master's degree — Industrial Design
TECHNICAL UNIVERSITY OF VARNA
Sep / 2025 - current

Bachelor's degree — Industrial Design
TECHNICAL UNIVERSITY OF VARNA
Sep / 2021 - May / 2025

High School of Mathematics
"PPMG NANCHO POPOVICH" SHUMEN
Sep / 2016 - May / 2021

CERTIFICATES

UX - UI Design Master
UDEMY COURSE
Nov / 2024 - Feb / 2025

UI Design Fundamentals
SOFTWARE UNIVERSITY - SOFTUNI CREATIVE
Dec / 2022 - Jan / 2023

UX Design Fundamentals
SOFTWARE UNIVERSITY - SOFTUNI CREATIVE
Nov / 2022 - Dec / 2022

Photoshop Fundamentals
SOFTWARE UNIVERSITY - SOFTUNI CREATIVE
Oct / 2022 - Nov / 2022

LANGUAGES

ENGLISH - B2;

BULGARIAN - NATIVE;
